

**Finding possibilities.** *We are growing with you very soon. ERPDUO CG a specialist IT/OT and ERP company was established in 2015 with HQ in Norway. The ERP segment is growing with 40 percent growth and as far as there are companies, so will the need for ERP software persist. ERPDUO acquired Qavali ai recently and we wish to raise capital and establish in new regions in Asia, Africa and America. Europe has been our home market for 51 years. The company's majority ownership is within Daswandi Khans family with a background from Norway-UK-Pakistan. You can make a company and have earnings for years, but to grow with staff, in new regions with new technology and new challenges requires a responsible and great leadership. Commitment, consistency and dedication is always in need. We have had focus on ESG, ethics, anticorruption, GRC, Greentech, R&D and cloud technologies for years. For bidding we need sales staff. For engineering more competent staff, for growth more earnings. The ambition is to have 1000 employees within 5 years. For some the future is behind one. We don't need to be the fastest sprinter in the class, but we need sustainable quality to survive decade to decade. In that respect we are now open for independent stakeholders to join us.*

- **Independent advisors & company leaders**
- **Board directors from private sector**
- **GM or CEO for a specific country or region.**
- **Chairman for given country or region**
